Hoist Scaffold DM 200AP

Product information

DM 200AP High performance Scaffold Hoist is designed for use in industrial or construction applications. Can be fitted directly to a standard 48mm scaffold tube in a position to enable it to be rotated through 180 degrees to allow safe loading and unloading by the operator. The front-loading drum for the wire rope reduced the risk of bunching when used on scaffolding that is not perfectly straight.

Features

- Front loading drum
- Power supply 1 phase 220-230V 50Hz
- Pendant control cable length 1,5 – 5,0 m
- Duty Cycle S3 class
- Rope diameter 5mm
- Supplied with 12 months warrant
