

Fork Mounted Jib

Product information

When height is not at a premium, but maximum lift capacity is critical, the Fork Mounted Jib allows the movement of long and awkward loads from inaccessible locations with the potential of 4 different lifting centres.

Standard Features

- Multi hook positioning from 1000-1750 load centres
- Supplied complete with single swivel hook and bow shackle
- Maximum fork section 150 x 50 at 435 mm centres
- Zinc plated heel pins for safe attachment to truck
- Painted bright orange safety
