

Running Line Monitor Telemetry

Product information

The DLM Telemetry Running Line Monitor measures the tension on a rope passing through its three wheels. Typically used in cable laying and winch operations to measure and record line tension. The robust and wireless design has become an industry standard.

Product available in the following sizes: 15T, 60T, and 200T

Features:

- 800m wireless range
- Compatible with TW-3.0 products
- Fully sealed design to IP67
- Robust design suitable for harsh environments
- Integral speed and distance measurement as well as tension
- Easy to rig without the need to remove sheaves from axles
- Lifting and securing points
- Optional mounting fixtures

Applications:

- Winch load monitoring
- Towing and salvage
- PLGR
- Cable laying

Part code	Size
