

## Shortening Clutch with Double Lock Green Pin® UGDV

### Product information

The Green Pin® Shortening Clutch with Double Lock is a grade 10 shortening clutch with double locking pin. The shortening clutch is an essential part of chain slings, used to shorten the length of the chain leg and prevents instability of the load. The clutch compared to the shortening hook makes a straight pull possible. This clutch is a removable clutch which can be added occasionally to the chain leg and then be removed fast to get back the initial length. This shortening clutch is available with a double locking system, designed to prevent accidental disengagement of the chain. The Green Pin® Shortening Clutch with Double Lock is available in a range to suit 6 mm up to 13 mm grade 10 chain.

Certification on request: 2.1, 2.2, 3.1, MTCa, MPIb
