

Jon Buoy EVAC

Product information

The Ocean Safety Jon Buoy range is synonymous with being the elite product offering for aiding a man overboard, and its capabilities are unique in the marine safety industry.

The latest addition to the Jon Buoy range, the Jon Buoy EVAC is designed specifically for the leisure boater, whether under sail or power. Providing a safe and reliable alternative when a full liferaft is deemed not to be required, but still providing a safe and reliable, short-term, means of abandonment. The EVAC is available in 4 or 6-person configurations, making it ideal for those who require essential safety without the bulk of a traditional raft.

Simple and quick to deploy, the EVAC is designed for ease of use, compact storage, and convenient transport, easily stowed and can be removed when not in use. It comes complete with an inflatable arch and canopy (which are fitted by the user upon boarding). The high-visibility fluorescent yellow carcass and bright red canopy ensure maximum visibility in emergencies. For ease of access, the EVAC is equipped with a boarding ladder and external grab handles. Supplied in a semi-rigid highly visible valise and supported by 3-year service intervals, this unique piece of safety equipment offers reliable, accessible protection when it matters most.

Features:

- Automatic inflation
- 4 person options
- Quick & simple to deploy
- Highly visible
- 3 year service interval
- Fitted with AOMI light
