

Pathfinder™ PRO SART ACR

Product information

Pathfinder PRO is a Search and Rescue Transponder (SART) designed to help search and rescue teams locate survival craft during maritime emergencies. When interrogated by an X-band marine radar, it generates a distinctive radar response that enhances visibility on nearby vessel radar displays, making it suitable for SOLAS-compliant commercial vessels and offshore operations.

Best used for:

- SOLAS vessels operating under GMDSS carriage requirements.
- Commercial ships, offshore vessels, and yachts carrying multiple life rafts.

Product benefits:

- Returns 12 radar blips to improve detection by nearby rescue vessels.
- Operates on the 9.2 to 9.5 GHz marine radar band when interrogated.
- Lithium battery provides over 96 hours standby and more than 12 hours active operation.
- Compact, waterproof design with wall mount and telescopic pole for flexible deployment.
- Complies with IMO SOLAS requirements and meets IMO, MED, FCC, and IEC standards.
