

ResQLink™ 400 Personal Locator Beacon ACR

Product information

ResQLink 400 is a compact 406 MHz Personal Locator Beacon (PLB) designed to summon international search and rescue services during life-threatening emergencies. Suitable for use on land, at sea, and in the air, it combines GPS and Galileo positioning with global Cospas-Sarsat satellite coverage, without requiring an ongoing subscription.

Best used for:

- Hiking, climbing, camping, paddlesports, boating, fishing, and other remote outdoor activities.
- Individuals requiring a lightweight emergency beacon with global satellite distress alerting.

Product benefits:

- GPS and Galileo positioning enables accurate emergency location reporting.
- 406 MHz distress signal with 121.5 MHz homing supports rapid rescue location.
- Compact, buoyant design is easy to carry across land and marine activities.
- Integrated visible and infrared strobes improve detection in low-light conditions.
- Cospas-Sarsat approved with no subscription required for emergency satellite alerting.
