

ResQLink™ 410 RLS Personal Locator Beacon ACR

Product information

ResQLink 410 RLS is a compact 406 MHz Personal Locator Beacon (PLB) designed to summon international search and rescue services during life-threatening emergencies. Featuring GPS and Galileo positioning with Return Link Service (RLS), it confirms that your distress message has been received, providing added reassurance during rescue situations without requiring a subscription.

Best used for:

- Hiking, climbing, camping, paddlesports, boating, fishing, skiing, and other remote outdoor activities.
- Individuals requiring a lightweight emergency beacon with global satellite distress alerting and Return Link Service confirmation.

Product benefits:

- Return Link Service confirms your distress alert has been received.
- GPS and Galileo positioning provide accurate emergency location reporting.
- 406 MHz distress signal with 121.5 MHz homing supports rapid rescue location.
- Built-in buoyancy with visible and infrared strobes improves detection in marine and low-light conditions.
- Cospas-Sarsat approved with no subscription required for global emergency alerting.
