

ResQLink™ View Personal Locator Beacon ACR

Product information

ResQLink View is a compact 406 MHz Personal Locator Beacon (PLB) designed to alert international search and rescue services during life-threatening emergencies. It combines GPS and Galileo positioning with a digital display that shows live beacon status and GPS coordinates, helping users verify operation while benefiting from global Cospas-Sarsat satellite coverage without a subscription.

Best used for:

- Hiking, climbing, camping, paddlesports, boating, fishing, skiing, and other remote outdoor activities.
- Individuals requiring a compact emergency beacon with a digital status display and global satellite distress alerting.

Product benefits:

- Digital display provides live beacon status and GPS coordinates.
- GPS and Galileo positioning enable accurate emergency location reporting.
- 406 MHz distress signal with 121.5 MHz homing supports rapid rescue location.
- Built-in buoyancy with visible and infrared strobes improves detection in low-light and marine environments.
- Cospas-Sarsat approved with no subscription required for worldwide emergency alerting.
