

ResQLink™ View RLS Personal Locator Beacon ACR

Product information

ResQLink View RLS is a compact 406 MHz Personal Locator Beacon (PLB) designed to alert international search and rescue services during life-threatening emergencies. It combines GPS and Galileo positioning, a digital status display, and Return Link Service (RLS), allowing users to confirm that their distress message has been received while benefiting from global Cospas-Sarsat satellite coverage without a subscription.

Best used for:

- Hiking, climbing, camping, paddlesports, boating, fishing, skiing, and other remote outdoor activities.
- Individuals requiring a compact emergency beacon with Return Link Service and a digital display for real-time status updates.

Product benefits:

- Return Link Service confirms your distress alert has been received.
- Digital display shows live beacon status and GPS coordinates.
- GPS and Galileo positioning provide accurate emergency location reporting.
- 406 MHz distress signal with 121.5 MHz homing supports rapid rescue location.
- Built-in buoyancy with visible and infrared strobes improves detection in marine and low-light environments.
